## Snow plough blades from professionals in practice / the field

With TELEFLEX® snow plough blades, winter maintenance is no longer a problem, even with varying path widths, narrowings, parking spaces and obstacles. Clearing snow has never been as efficient, flexible and safe as with a TELEFLEX® snow blade. It can be extended to almost double the clearing width while driving.

### Efficient, flexible and safe broaching

- » Up to 70% higher area output
- » No changeover times
- » Less manoeuvring
- » smaller and fewer vehicles required

### Flexible, safe

- » Pavements of different widths in one operation
- » Side streets e.g. with two instead of five clearing lanes
- » Special areas included: pedestrian zones, narrowings, car parks...
- » Reduced risk of accidents: obstacles can be cleared without any problems

### Cost savings

- » smaller and fewer vehicles needed
- » less time required
- » quick amortisation

### Our customers

- » Municipalities, local authorities
- » Service providers, caretaker services
- » Companies with large premises
- » Agricultural businesses

### Professional quality

- » Robust design with long service life
- » High-grade professional quality
- » Developed from practical experience, for practical use
- » Patented concept
- » Made in Sigmaringen, Germany

### CO<sub>2</sub> savings

- » smaller and less vehicles needed
- » considerable reduction in journeys

**TELEFLEX® 12-20 / 15-26 / 20-35 . Highly efficient telescopic snow ploughs**

**Basic equipment / technical data**

	<b>TELEFLEX® 12-20</b>	<b>TELEFLEX® 15-26</b>	<b>TELEFLEX® 20-35</b>
<b>Total width</b> stepless from-to [cm]	125 – 205	150 – 265	202 – 350
<b>Clearing width</b> from-to [cm] (at 30°/0° swivel angle)	Ca. 104 – 205	Ca. 130 – 265	Ca. 170 – 350
<b>Shield height</b> [mm]	620	620	780
<b>Weight</b> [kg]	170	190	480
<b>Equipment</b>	- Polyamide scraper bars - Hydraulic swivel device - Hydraulic extension/telescoping device		
			<b>in preparation</b>

**Special equipment & accessories**

- Professional overload protection**  
(protection of the shield in case of collision)
- Electric 2-way valve**  
(for additional control circuit, if required)
- Professional wheels with holder**
- Flag holder + warning flags**
- Position light IAW StVZO**

**Mounting device**

- Equipment triangle Cat. Communal**
- Three-point connection cat. 0**
- Three-point connection cat. 1**

Other connections available upon request.
