

MaxDRP and MaxDRP Plus Teeth Standard and Hammerless Teeth for J-Series Noses

Don't settle for inferior J-Series teeth. Leverage ESCO's optimized MaxDRP point shapes and proprietary alloys for up to 25% more wear-life and get quicker and safer change-outs with the MaxDRP Plus hammerless locking system. Available in a broad range of nose sizes, both products can be seamlessly installed on existing J-Series adapters with no modification required.

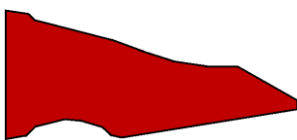

Optimized Point Shapes

- Improved penetration
- Higher % of wear material
- Less throw away weight

 ESCO  Competition

ESCO

Competitor

Hardness (Brinell)

ESCO Proprietary Alloys

- Increased wear-life
- Superior reliability
- Consistent performance

Hammerless MaxDRP Plus

- Increased safety
- Quicker tooth changes
- Reduced maintenance costs

MaxDRP and MaxDRP Plus Teeth

Standard and Hammerless Teeth for J-Series Noses
